Summary

A software enthusiast who develops software for the benefit of society. I have worked on several real-world projects, including PayAware, the Lost and Found mobile app, and various AI-related apps.

Skills

Programming & Querying: SQL, Python, Java, Full Stack Development

Other Tools: VSCode, Git, Github, Bash scripting

Projects

- **Volpe Frontend (Volpe Frontend)**

Frontend for the volpe framework. This is a project related to Volunteer computing Platform for Evolutionary Algorithms. A frontend dashboard for visualizing the problems and their instances running on different systems.

- **Lost and Found Mobile App (Amrita Retriever)**

A lost and found mobile application built using Flutter. This app allows users to login and add posts related to Lost or Found items. Integrated proximity alert that gives notifications to users when the person who posted Lost item is near.

- **PayAware: Financial Tracker(PayAware)**

A transaction tracker used to log the details of the transactions made by a user. Uses AI to give insights about the details of the transactions made by the user and also to log the transactions. The user can give the transaction details via voice and if some details are missing, the AI itself asks back for the missing info for logging the details.

- **Focus: Productivity Web App (Focus-App)**

A productivity app built with React, Firebase, and Spotify integration. Offers focus session management, to-do lists, timers, stopwatch, and world clock, all within a modern UI and Google authentication.

- **Placement Tracker Web (placement_tracker_web)**

Web application for students and faculty of Amrita Vishwa Vidyapeetham to track placements and internships, featuring dashboards and management tools for academic communities.

- **TextSummariserAi (TextSummariserAi)**

A web-based tool for AI-powered text summarization and conversational analysis. Built with React and Vite, it can summarize large texts or PDFs and provides an AI chat interface for analysis.

Certifications

- **Ethical Hacking Certificate – Internshala (2024):** Got to know a lot about the different hacking techniques and learnt the techniques of malware analysis.

Education

BTech Computer Science and Engineering

Amrita Vishwa Vidyapeetham, Coimbatore

Currently Pursuing: 2026

CGPA: 9.27 / 10
